Integrate using Web API

Welcome, Stefano!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Send your first email

Choose one of these common ways to send email. You can always explore the other options later.

Integrate using our Web API or SMTP Relay

Easily send API-driven email from your application.

Start

Build and send using Marketing Campaigns

Build engaging email marketing campaigns that deliver results.

Start

Integrate with third-party applications

Quickly send email from Wordpress, Drupal, Magento, and other popular applications.

Choose a setup method

RECOMMENDED

Web API

The fastest, most flexible way to send email using languages like Node.js, Ruby, C#, and more.

Choose

SMTP Relay

The easiest way to send email. It only requires modifying your application's SMTP configuration.

How to send email using Node.js

1 Make sure you have the prerequisites

2 Create an API key

3 Create an environment w

4 Install the package

5 Send your first email

1 Make sure you have the prerequisites

Our library requires Node.js version 0.10, 0.12, or 4.

2 Create an API key

This allows your application to authenticate to our API and send mail. You can enable or disable additional permissions on the API keys page.

"Sfr" was successfully created and added to the next step.

S6.pvGTGL18R6wC2s

3 Create an environment w

Update your development

1 echo "export SEN

2 echo "sendgrid.e

3 source ./sendgrid.env

id.env

4 Install the package

The following recommended installation requires npm. If you are unfamiliar with npm, see the npm docs. Npm comes installed with Node.js since node version 0.8.x, therefore you likely already have it.

1 npm install --save @sendgrid/mail

5 Send your first email

The following is the minimum needed code to send an email:

1 // using Twilio SendGrid's v3 Node.js library

2 // https://github.com/sendgrid/sendgrid-nodejs

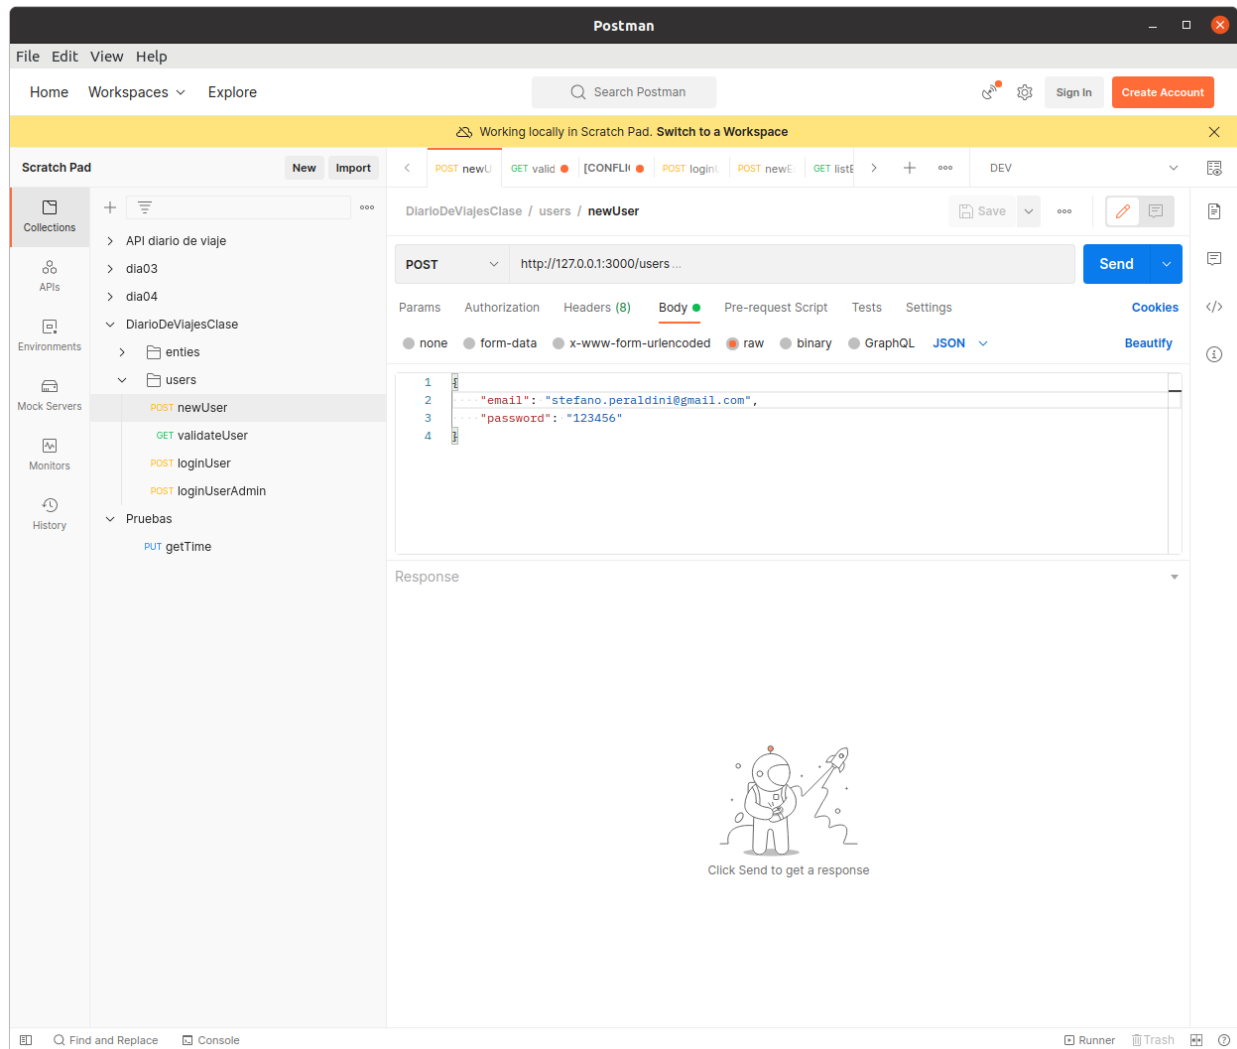

3 javascript

4 const sgMail = require("@sendgrid/mail")

5 sgMail.setApiKey(process.env.SENDGRID_API_KEY)

Copy API KEY on .env

Test POSTMAN

Verify integration after the POSTMAN test
